```java
// Bitwise Operator
import java.io.*;
class BitwiseOperator{
    public static void main(String[] args) {
        int a=10; int b=15;
        System.out.println("Bitwise AND :"+(a & b));
        System.out.println("Bitwise OR :"+(a | b));
        System.out.println("Bitwise XOR :"+(a ^ b));
        System.out.println("Bitwise NOT a:" + ~a);
        System.out.println("Bitwise NOT b:" + ~b);
    }
}
```
